

StubHub Design System

Oct 2021 - Jul 2022

Stubhub design system for design + development to produce reusable, consistent frontend outputs thus a unified outcome of the end user experience.

With the migration and merger of StubHub and viagogo, as well as the limited design resource to support the entire company, the Design System is quite essential for the broader teams to self-service and keep brand consistency.

My Role

Core UX Designer

My Contribution

- Create Design Kit
- Contribute & Maintain DS showroom & website
- DS Education & Training for FEDs
